https://github.com/hamza442-ali/backend_DepEase.git

Project 2

Project Title: Adara(Current Project at Invotyx Company)

Technology Used: Node Js (Nest Js)

Description: This is my Company Project in which Basically users can upload their app's apk and there is subscriptions module, stripe Payment modules, Analytics module and much more.

GitHub Link: not Shareable

Project 3

Project Title: TechSella

Technology Used: (React, Node Js, Express Js, MongoDB)

Description: Developed a fully functional e-commerce platform using the stack to facilitate online purchases of laptops and mobile phones.

GitHub Link: <https://github.com/abdullah117765/Ecommerce.git>

Project 4

Project Title: Profiler

Technology Used: (Mern Stack, Docker, AWS EC2)

Description: We created a web Application that Manages the Persona of the user and then using the help of the docker compose we deployed the application to EC2 instance of AWS.

GitHub Link: https://github.com/abdullah117765/SCD_Project.git

Freelancing Projects

Description: I have Developed many other Freelancing Projects for clients in the following tools (MongoDB, Express.js, React.js, Node.js).

ACCOMPLISHMENTS

1. Participation in Softec Programming Competition
Institution: FAST NUCES Lahore 2021
2. Participated in Create 21 Startup pitching Competition.
Institution: PIYEAS University Islamabad 2021

3. Winning Software Quiz Competition Daira

Institution: Fast Nucs Faisalabad 2023

SKILLS & ABILITIES

- Mern Stack (**Node**, **Express**, React Js, **MongoDB**)
- **TypeORM, Prisma**
- **Postgress Sql, MySql**
- **Nest Js**
- Docker (containers, images, Volumes)
- Jenkins Ci/Cd Pipeline Creation, Linux
- Aws Cloud Practitioner
- YAML and python/bash Scripting
- MLOPS
- Cloud And Cloud Security
- Requirements Engineering / Software Reengineering
- Java/C#/JavaScript
- Html/CSS/tailwind CSS
- Operating System and Computer Networks
- Data Structures and Algorithms
- Databases SQL and no SQL
- Information Security and Block chain Basics
